Task - Business Insights

1. **Executive Summary**

The dataset contains :

Transaction-line records	= 51,271
Total Columns	= 12
Distinct orders	= 25,029
Distinct customers	= 795
Distinct product IDs	= 10,290
Average Discount	= 14.292%
Total sale	= 12635222
Total Profits	= 1467497.615

2. Data quality notes

Transaction rows	= 51,271; 0
Missing customer names	= 79 Which is Handle with NA
Missing profit	= 14 which is Handle with NA
Invalid ship dates	= 0 None detected in this check.
Currency	= Not stated in columns Do not label USD/INR

3. Key business insights

Growth :

In 2024 more Growth happens according to sales= Total sales - 4293920
In 2011 less Growth happens according to sales= Total sales - 2259569
Overall growth happens in this projects which is smoothly increase for growth quality

Market and region :

The Apac Market generated the highest revenue with better profit.
The values are - APAC 84894 4650.574200000004
Southeast Asia has the lowest margin among the region values (1.99%) and should be reviewed for discount depth, product mix, and fulfillment costs.

Category and segment:

Technology leads by sales (4,742,975) and profit (663,200); its margin is 13.98%. Furniture has a comparatively lower margin. The Consumer segment is the largest by sales (6,503,476) and profit (748,246).

Products:

677 products have negative cumulative profit. Review the bottom products by profit before changing assortment; validate product cost, shipping, discounts, and returns if available

Discounts:

>30–50% and >50% discount bands show negative aggregate profit. This is an association in the observed data, not proof that discounting alone caused the losses.

Shipping:
Standard Class is the most frequently used mode with 15,151 distinct orders. Average elapsed time from order to ship date is 4.0 days (median 4). Review shipping cost and profit together when assessing faster shipping options.

4. Power BI interaction checklist

- **Executive Overview:**
  KPI Cards - Total sales,profit,order and Quantity ,Average Discount and Profit Margin
  Visual - sales by region - Bar Chart
  Sales by Category - Pie Chart
  Sales by Sub-Category - Bar Chart
  Quantity, profit and Average Discount by Region = HeatMap
  Sales, profit by region = Maps
